

About us

Powertron infrastructure, founded in 2017, started with a small team of energetic engineers who wanted to achieve something in the power generation sector. Rial used to advertise brands, products, and services.

Our mission statement is "Power is in your hands" which means "Anybody (individual, small/big organization) can set up a power supply chain with zero to minimal effort when Powertron is with you".

We are an emerging infrastructure development organization providing services for non-conventional energy sectors.

Our Mission

We work hard to achieve our mission -
"Providing power supply at low cost"
"On time completion of the project as per commitment with No Compromise in Quality"

POWERTRON INFRASTRUCTURE

POWER IN YOUR HANDS

“

**The strength of the team is each individual member .
The strength of each member is the team**

Our Achievements

We have commissioned more than 400 KM's 11KV to 66KV single and double circuits

We have commissioned more than 40 Nos of HT side erection

Telecommunication

We have charged DP Yard Works for more than 1500 Nos of wind turbine generators.

CLIENTS LIST

L&T Infotech

Our Services

Construction of Electrical and Civil Activities in Wind/Solar power generation plant

Execution, installation, and commissioning of
EHV Transmission Lines up to 66KV Level
EHV Substations up to 110 KV Level
LT/HT transmission lines

Installation of HT/LT equipment for commercial as well as industrial sector

Telecommunication

Our team members are experts in the construction, erection, and installation of Substations, Transmission tower lines, OHT Lines, all types of Civil activities.

We have supported our customers to set up their wind and solar power projects in several places across South India and Maharashtra.
